

Facebook App

Instagram App

The ever changing social media platform that strives on providing unique and personal expression is available on the smart phone. This particular app updates simultaneously as the actual online platform. The instant connection between the Smartphone and Facebook provides the user to constantly update friends and family members of daily activities.

Why post a normal picture when you can instantly post a unique and “retro” looking one? Instagram is an iPhone app that creates square, vintage, retro pictures through colorful photo filters. It takes personal expression to a whole new level.

Smartphone Social Apps

Google+

Twitter App

Google has created an official Google+ app that allows you to use your smartphone to connect instantly with your circle of contacts. Feel like updating your friends? Use the app. Want to create a hangout and talk face to face with video chat? Use the app. Connect with your stream to see exactly what your connections are doing. Stay in touch with Google+ mobile app.

Would you describe yourself as a Tweet Addict? Do you have the constant need to update the people in your life within 160 or less words? If this describes you, this adding the twitter app is a must to survive everyday life. By adding this app, Twitter is at your beck and call to keep your social online life active as well as accurate.
