

MUST HAVE

SOCIAL MEDIA APPS FOR YOUR SMARTPHONE

TWITTER

Do you consider yourself a "tweet" addict? If you need to update the people in your life within 280 characters or less then Twitter is the right app for you! By adding this app you will keep your social life up to date and very active.

FACEBOOK

Facebook is the ever changing social media platform that provides unique and personal experiences to those that use it! It has the capability to constantly update your friends and family on your daily activities.

INSTAGRAM

Why use normal photos or a video when you can instantly post a unique and "retro" looking one? Instagram is an iPhone and Android device application that creates square, unique photos through colorful photo filters.

WHATSAPP

The sole purpose of WhatsApp is to allow you to use it for messaging friends or family, typically if you are not located in the same countries. Among the most used messaging apps for adults are Facebook and WhatsApp

LINKEDIN

LinkedIn is a social platform that is great for marketing yourself to other adults who are in your industry. You are able to share content about your background so that users are able to get to know you on a professional level.
